COMPANY OVERVIEW

DGF Industrial Innovations Group's facility includes a machining division and fabrication shop where we make all types of steel structures and components. Our highly trained CNC machinists and D1.1 Certified welders work within a rigorous Quality Assurance program. Vertically integrated across several processes, DGF can deliver products on time and within quick turn arounds.

CORE COMPETENCIES

- CNC Machining (Lathe & Mill)
- Plasma Cutting
- Welding/fabrication
- 3-D modeling & design
- Bending
- Sawing
- Sandblasting
- Coatings

DIFFERENTIATIORS

- On site CWI (Certified Welding Inspector)
  - Reducing inspection delays and increased compliance
- D1.1 (AWS) Certified Welding staff
- Multiple work shifts to accommodate tight deadlines and capacity for growth
- Successful in-house training and apprenticeship program for new welders & machinists

NAICS CODES

332312 – Fabricated Structural Metal Manufacturing
332710 – Machine Shop
332420 – Metal Tank (Heavy Gauge) Manufacturing
332439 – Other Metal Container Manufacturing
332999 – All other Misc. Fabricated Metal Manufacturing

PAST EXPERIENCE

- National Grid
  - Custom designed transmission line upgrades NY, RI, MA
- ReWorld Waste
  - Machined metal parts and welded components
  - Custom engineered parts
  - Refurbishments
- Win-Waste Innovations
- Martin Environmental Technologies
  - Stoker parts, conveyors, large weldments
- New England Mechanical Overlay
  - Various machined metal components
